Chairman Julius Genachowski:
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Re: 11-109 Docket, Public Notice Reply Comments

Dear Chairman Genachowski:

When I ran for State Senate last year, I ran on my record of giving back to the community. From volunteering as a soccer coach and board member, to serving as Chairman of the Pascagoula Excel by 5 Coalition, to providing recommendations to rebuild Pascagoula after Hurricane Katrina as a member of the Renaissance Commission, I am committed to doing my part to best serve the people of Pascagoula and Jackson County.

You are currently open for comments concerning a company called LightSquared and their technology that will open doors to affordable broadband communication, not just to our part of Mississippi, but to 260 million other rural Americans. I understand that there have been concerns regarding interference with GPS, but am concerned that those on the GPS side of the fence are circumventing the process in their demands that LightSquared be shut down. This technology is too important not to examine the issue from every side, and come up with a solution that will allow for a healthy GPS system and LightSquared to coexist.

If no compromise can be reached with respect to the older GPS devices and the interference issues, I urge you to explore an alternative spectrum solution that will allow LightSquared to deploy their network and bring affordable access to the millions of Americans who are currently without.

Sincerely yours,

Senator Brice Wiggins
Mississippi Senate, District 52
